About Program

Taiwan Tech is a top technical university and all of our departments under college of engineering are ranked 100~150th around the world. We have been recruiting international graduate students for more than 10 years and now we want to extend our technical and vocational education to international college students, hence we launched a new 2 **years Bachelor of Science (BS) Degree program in Chemical Engineering**.

This two-year course program is offered to international students having an **associate degree or a diploma** from junior college or students having completed 2 years studied in university or college with background in chemical engineering or related fields, such as chemical technology, food technology, and etc. All the courses within this program are taught in English. In addition, Chinese Lessons and Industrial Internships in Taiwan will also be offered. Students who finish the required course work will receive **Bachelor of Science degree (B.S)** from Department of Chemical Engineering, National Taiwan University of Science and Technology (or Taiwan Tech in short). All the admitted students in this program are required to take at least 72 credits, including Chinese Lessons and Industrial Internships.

Why choose this program?

Taiwan Tech is the top higher education campus and the best technical university in Taiwan. Our faculty members are very active in both research work and teaching. In addition, Taiwan Tech has been well recognized by all sectors of society in Taiwan for its academic and practical achievement in several important area, such as cooperation with industry, promotion of entrepreneurship and technology licensing. This 2 years International Program not only provides fundamental courses for students, but it also provides cutting edge technical and practical lessons in the laboratories and industries, enabling students to have hands-on experience during their studies at Taiwan Tech.

Application Qualification?

Applicants must have completed an education curriculum of two-years junior college or equivalent two-years university educational level with background in chemical engineering or related fields, such as chemical technology, food technology, and etc. outside Taiwan by September, 2018.

Tuition: around **4,000** USD/academic year

How to Apply?

■ Documents for application

1. *Application form.*
2. *Diploma of junior college with Transcript of academic records or Transcripts of first 2-years related field study*

3. *English Proficiency Test Certificate (Optional) like TOFEL, TOEIC, or IELTS.*
4. *Recommendation Letter*

■ Important Dates

Application Deadline:

- 31/July/2018

Notification:

- 15/August/2017

Semester begins:

- Middle of September/2018

■ Scholarships

Various scholarships are available for students with good academic records.
